## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 11-15, 20-24, 29-33, 38-40, drawn to solid state image sensors employing the use of microlenses, classified in class 359, subclass 642.
- II. Claims 16-19, 25-28, 34-37 41-44, drawn to solid state image sensors comprising a pixel array of a first and second aspect ratio, classified in class 250, subclass 208.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as being drawn to solid state image sensor devices but separate and distinct types of sensor devices. The specifics of the Group I invention are not needed for the Group II invention and vice-versa.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
